

CARDINAL FARLEY IS WELCOMED HOME

JOHN CARDINAL FARLEY.

The North German Lloyd steamship *Berlin*, on which the cardinal and his party came home.

Men and boys raced behind the cardinal's carriage. One priest ran out from the curb near Maiden Lane and kissed the cardinal's ring. A block of two to the north two women, one an Italian and the other an old Irish woman, scrambled through the ranks around the carriage and asked Cardinal Farley to let them kiss the ring. He smiled and granted the request. These scenes were repeated along the entire route.

Cardinal Farley after this first excitement looked on with amazement at the outpouring. He told Monsignor Mooney during that ride to his Cathedral that he had expected, of course, some sort of reception as a mark of respect for the office bestowed upon him, but he had no notion of so great a civic outpouring.

There were great cheers at times, but mostly the reception was quiet. To-night the cardinal was driven out to see the illumination of the Cathedral which impressed him greatly.

unimportant details of the situation. The British minister, Stephen Leech, also visited the secretary, but the purpose of his visit was not revealed. It is believed, however, that it did not pertain to the present crisis.

The House of Representatives held an ordinary routine session to-day, no reference being made to the political crisis. The Senate sent a communication to President Gomez, giving assurance of sympathy and support in his efforts to compel compliance with the law and the preservation of order at any cost as the only way to save the republic.

The tone on the stock exchange was strong on the news of possible intervention, and in the Board of Trade there was great relief at the probable revival of business, which recently has been much depressed. From various parts of the island reports have been received that many planters, who heretofore had been afraid to begin grinding, now intend to put their mills into immediate operation. This will have the excellent effect of giving employment in the fields and mills to thousands now dissatisfied and liable to join seditious movements in consequence of lack of work. All parts of the island continue to stand in reports of peaceful conditions at the present time.

VIII Strengthen Gomez.

Washington, January 17.—President Gomez possibly will be made much more secure by the warning issued yesterday by the State Department in the opinion of officials here. It is held that the threat of intervention will go far towards relieving the Cuban President of his apprehension that this government was about to inaugurate another period of occupation.

For some time past President Gomez had been contemplating dealing forcibly and sternly with an element in Cuba that seemed determined to force its will upon the executive and Congress in defiance of law and the Constitution. To undertake to bring these people to terms by force, involving the arrest and perhaps the killing of some of them, might be regarded by the United States as an evidence of a revolutionary outbreak which would compel armed intervention. By yesterday's demand upon Gomez to carry out the constitutional guarantees, the

inevitably be raised periodically. So long as appointments to these offices must be confirmed by the Senate, and so long as appointments to them must be made every four years, just so long will it be impossible to provide a force of employees with a reasonably permanent tenure who are qualified by reason of education and training to do the best work."

Needless Expenditure.
Giving examples of excessive government expenditure along certain lines, the President told Congress that in one department it cost \$5.84 per thousand to handle incoming mail, and in another department \$54.40 per thousand. For handling outgoing mail, one department expended \$5.94 per thousand; another, \$65.88. Either one department paid too much or the other not enough, he said. In travel alone the government expends about \$12,000,000 a year. Definite tests, he pointed out, have shown that a saving in this item alone of a little over half of 1 cent a mile probably could be effected.

Through the introduction of labor-saving machinery, through the elimination of unnecessary copy work, by cutting down needless expense in the distribution of public documents, and in many other ways, could millions be saved each year. The President urged the adoption of the "budget system," which would bring before Congress, the press and the people of the country not only the proposed expenditures of the government, but its revenue.

"The United States is the only great nation whose government is operated without a budget," he said. Later, the President declared, he intends to send to Congress a plan for the retirement of civil service employees on pensions, which will safeguard the government interest and yet provide for their old age.
